

## POSITION PROFILE

<b>Client Organization:</b>	<b>RYCOM Corporation</b>
<b>Position Title:</b>	<b>Senior Building Systems Engineer</b>
<b>Reports To:</b>	<b>Team Lead, Senior Building Systems Engineer</b>
<b>Location:</b>	<b>Vaughan, Ontario/ Montréal, Québec (travel across Canada)</b>

## THE ORGANIZATION

**RYCOM is a trusted leader in Smart Tech solutions for public and private sector real estate, properties and portfolios for over 20 years.** The RYCOM team develops, delivers and supports the innovative strategy and the integrated layers of technology required to create Smart Buildings today that meet the demands of the future. By staying at the forefront of technology solutions, utilizing best-in-class support models, and delivering quality services with the highest level of care and support, RYCOM simplifies technology for clients so they can focus on their core business while achieving operational, environmental and measurable results.

## THE OPPORTUNITY

### Mandate:

- Bring world-class fault detection, optimization and business intelligence to our clients to deliver measurable improvements in operational efficiency and tenant comfort
- Provide engineering and operational support in to RYCOM’s client base to enable efficient building operations
- Support teams working to deliver SMART Building Technology solutions to RYCOM customers

### **Key Responsibilities:**

Use data collected from SMART building systems and the Bueno Data Analytics/FDD Platform to identify ways to:

- Optimize chiller and boiler plant operations
- Investigate and solve unexpected increases in plant equipment usage
- Investigate and solve unstable equipment operation and faults
- Provide technical advice to clients and team members based on findings
- Liaise with clients and assist with contractor management
- Liaise with site BAS technicians to promote data directed maintenance and verify success of interventions
- Provide various other consulting services as per RYCOM/BUENO business development activities
- Identify and capitalize on opportunities for business development and sales to new clients organically within our existing client base
- Build strong client relationships based on trust and respect
- Other duties as required

### **THE EXECUTIVE**

The successful candidate will demonstrate the following competencies:

- Experience performing building re-commissioning or retro-commissioning projects
- Energy efficiency knowledge
- Thermodynamics knowledge
- Engineering degree (preference)
- Licensed Engineer (preference)
- Strong interest in innovation
- Ability to read wiring diagrams and mechanical drawings
- Clear verbal and written communication in both English and French
- Well-developed interpersonal skills
- Driver's license

### **Performance Measures:**

- Individual and Team Performance with reference to KPIs
- Success in driving positive client outcomes from the RYCOM/BUENO service
- Client Relationships: measured by client satisfaction and feedback
